## REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

No prior art of reference teaches an inductor comprising a semiconductor substrate; a laminated structure having an insulating layer and a wiring layer alternating layers on the substrate, wherein the laminated structure has a first layer, a second layer and a first insulating layer located between the first and second layers; the first layer has a first wiring layer on which a first winding part and a second winding part in the same plane and disposed adjacent each other are wound; the second layer has a second wiring layer on which a first winding part is disposed having a single path from a first terminal to a second terminal; and said first insulating layer has first and second via holes connecting the first and second wiring layers, a first terminal of the first winding part is connected to a second terminal of the first wiring part through the first via hole and a third terminal of the second winding part is connected to a fourth terminal of the first wiring part through the second via hole; and a first current flows through the first winding part from a fifth terminal to the first terminal and a second current flows through the second winding part from the third terminal to a sixth terminal, with the first and second currents being in opposite directions with respect to each other when a voltage is applied across the fifth terminal of the first winding part and the sixth terminal of the second winding part.
